Going Green Together
With a fully digitised and painless administration process, FLEXTin is committed to helping the construction industry become **carbon neutral and paperless**.

Spot on Health & Safety
High quality site inductions, digitally tracked and signed H&S documents & RAMS and safe, secure storage of data gives you the peace of mind that you have it covered.

Always Informed
Enjoy full transparency through **online access** to sites or management reports for accurate, always up-to-date data. Site and Site Health & Safety audits can be carried out from anywhere with **direct access** to information on the cloud.

Technology that Works
FLEXTin's in-app messaging has the functionality to share documents and drawings, and communicate with trades without leaving the office. This empowers site managers to run their projects with the **focus on getting the job done**.

Buying Time, Saving Money
A smart, cost-effective way to manage site personnel and visitors by **fully digitising** site administration. Trades can submit their details, complete 95% of the site induction, sign the RAMS and complete all the necessary paperwork in-app so they're ready to start work when they arrive on site .

Improved Health & Safety
In the event of an emergency, an **evacuation list is instantly available**. Access information on site or from head-office to **collect and report daily** labour levels and H&S inquiries.

GDPR Compliant
FLEXTin provides a safe and secure cloud-based platform with all personal information safely stored in-app, removing the need for hard copies of personal information.

Working Smarter
Geo-fence technology allows for **real-time information** on who, and how many of each trade are on site at any time.
